FOR IMMEDIATE RELEASE

Concordia's fifth
education conference:
February 12 & 13, 1980.

Montreal, Quebec, February 1, 1980 -- Too much emphasis has been placed on the individual in education. That will be the position taken by Oxford University's David H. Hargreaves when he presents one of the keynote addresses at "Research Frontiers in Education: The Fifth Annual Concordia International Conference" later this month.

Scheduled for February 12 and 13 at the university's Sir George Williams campus, the conference will feature more than 20 speakers from the international educational community. All events are open to the public.

Other keynote speakers will include the University of Wisconsin's Robert Boyd on the use of small groups in adult education and other instructional settings, Florida State University's Roger Kaufman on "needs assessment and reality" and Margaret Lay-Dopyera of the University of Syracuse on "repertoire development".

Early childhood education will be one of the focuses of the conference with talks by Concordia's Carol Stamm on children's picture books, Concordia's Lois Baron on how television affects the development of play behaviour, Huguette Chaurette and Anthony Dean of L'Association de la pédagogie Waldorf on Waldorf education and Concordia's Mona Farrell on kindergarten teaching.

There will also be presentations on the use of computers in the classroom, French immersion, gifted as well as learning disabled children, adult education and aging.

All events take place in the seventh floor faculty lounge area of the Hall Building, 1455 de Maisonneuve Blvd. W. For further information, or for a complete schedule of events, contact the Education Dept., 879-4535.

Cinquième congrès sur l'enseignement à l'Université Concordia, les 12 et 13 février 1980

Montréal (Québec), le 1^{er} février 1980 -- On a trop accordé d'importance à l'individu dans l'enseignement. Telle est l'opinion que défendra un professeur d'Oxford University, M. David H. Hargreaves, lors d'un congrès sur l'enseignement, intitulé "Research Frontiers in Education: The Fifth Annual Concordia International Conference", qui se tiendra à l'Université Concordia dans le courant du mois.

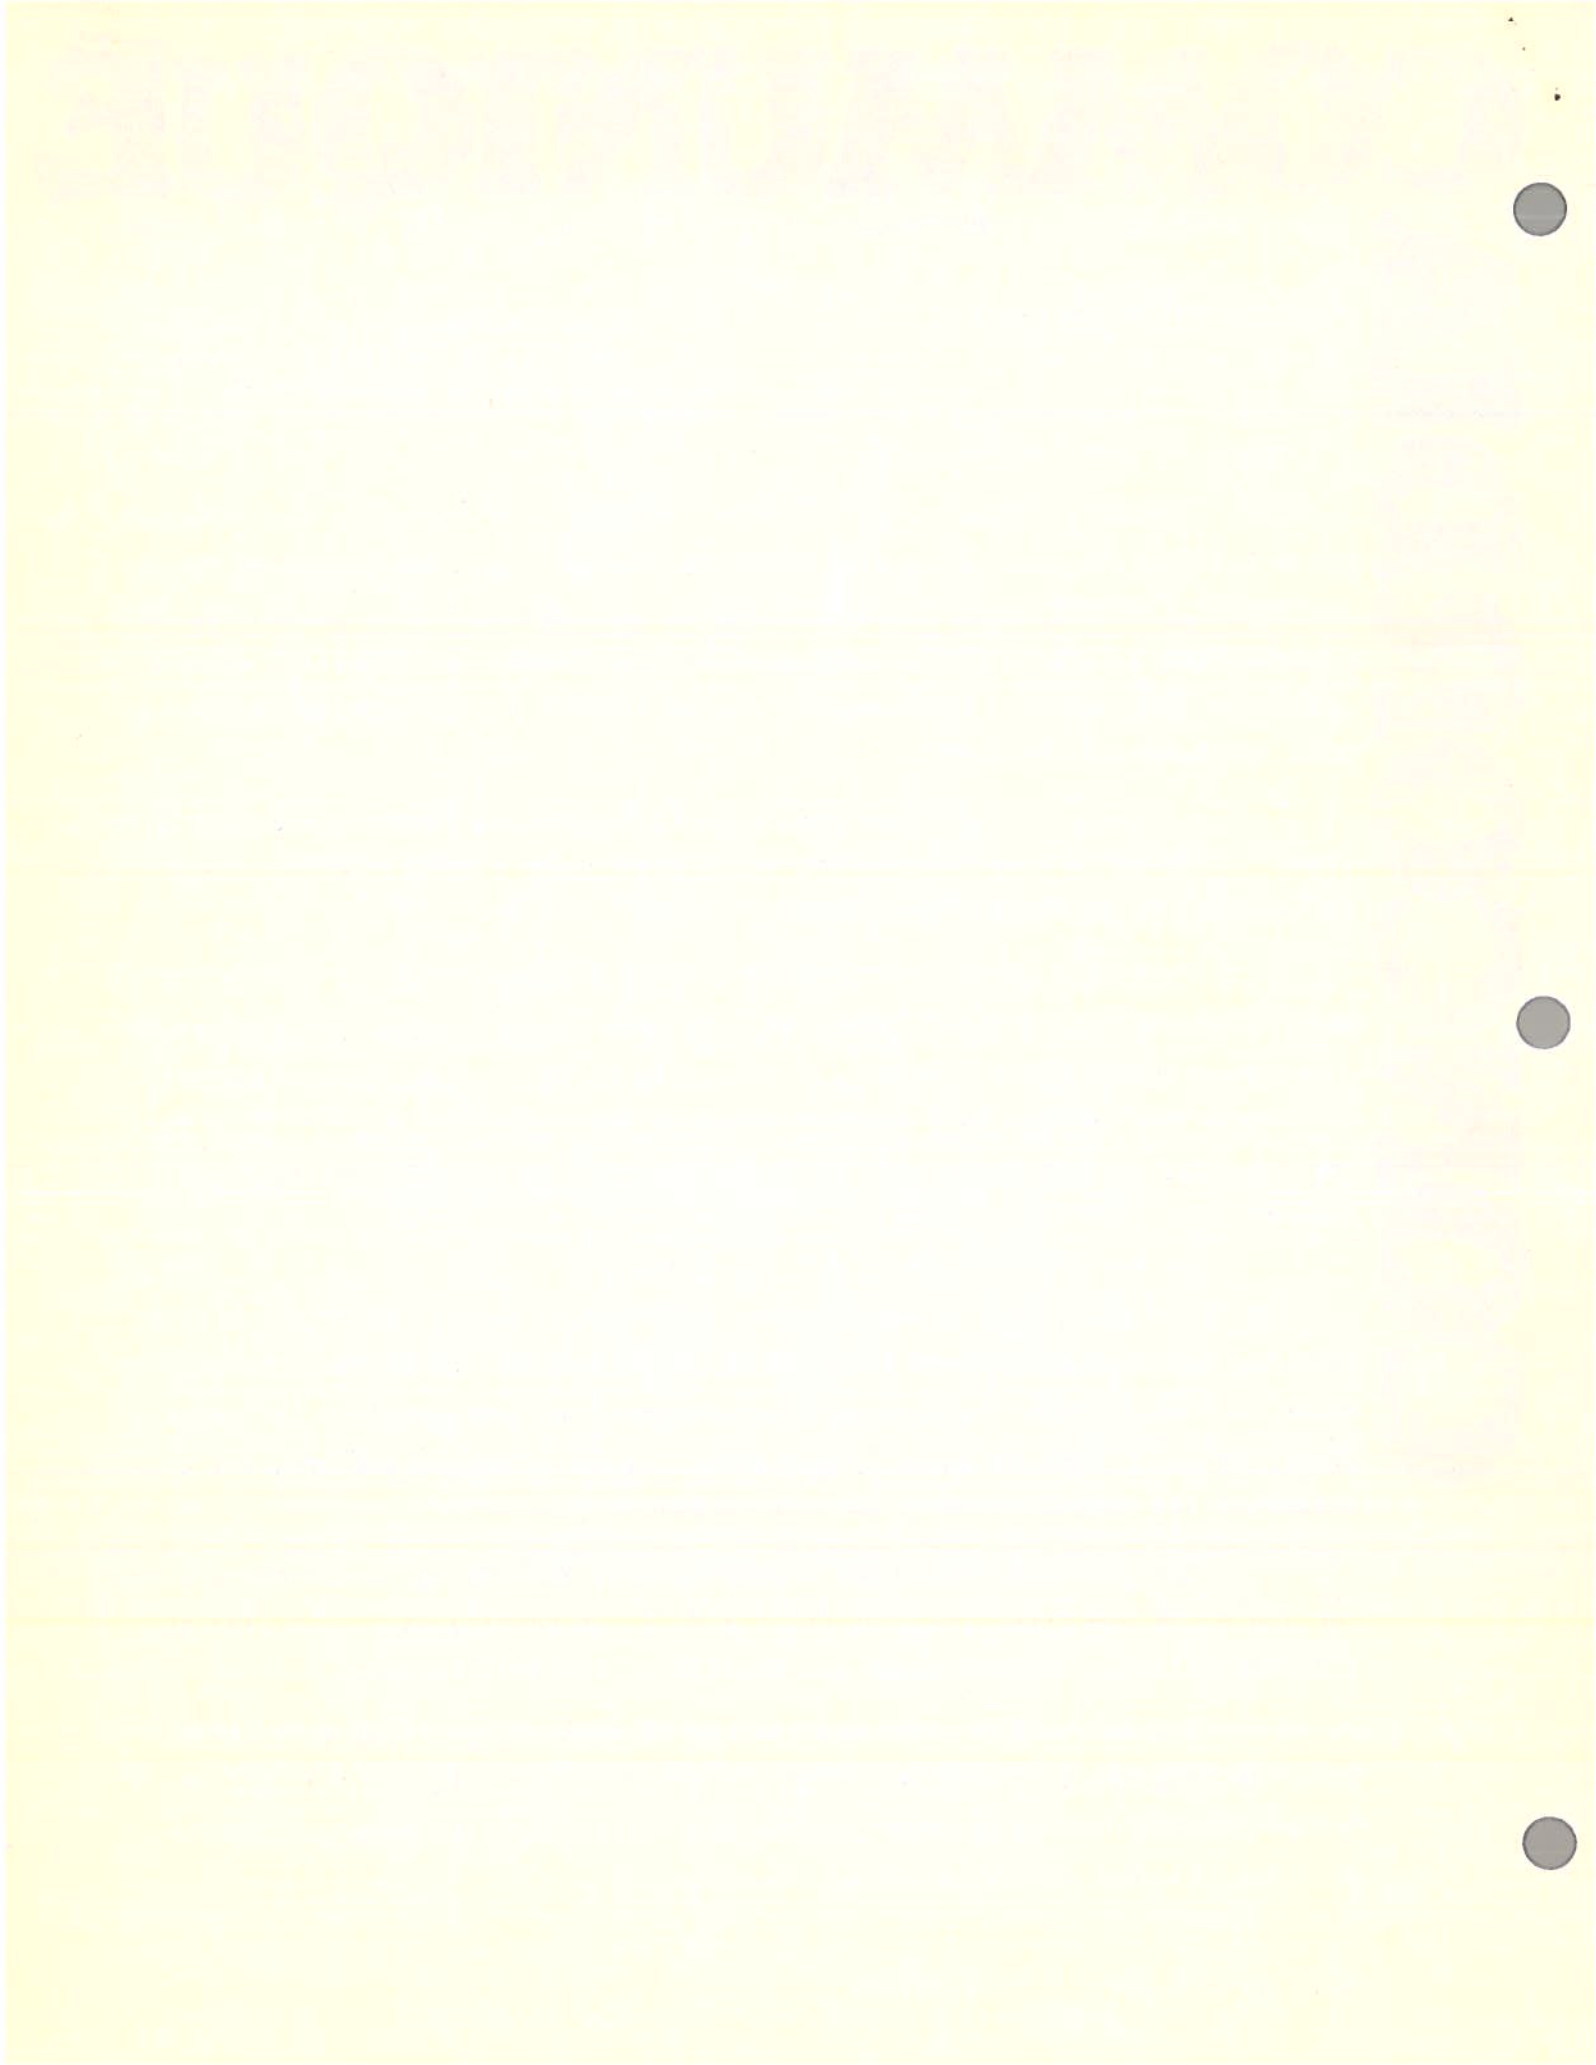

L'événement aura lieu les 12 et 13 février au campus Sir George Williams. Plus de 20 conférenciers du monde enseignant international y prendront la parole. Le public est cordialement invité.

Parmi les autres conférenciers, citons Robert Boyd, de University of Wisconsin, qui traitera des petits groupes dans l'enseignement aux adultes et d'autres procédés d'enseignement; Roger Kaufman, de Florida State University, qui prononcera une causerie intitulée "Needs Assessment and Reality", et Margaret Lay-Dopyera de University of Syracuse, qui parlera du "Répertoire development".

Un des thèmes majeurs du congrès sera la petite enfance. De l'Université Concordia, Carol Stamm abordera la question des livres d'images pour enfants, Lois Baron celle de l'impact de la télévision sur le comportement ludique et Mona Farrell traitera de l'enseignement à la maternelle. Huguette Chaurette et Anthony Dean, de l'Association de la pédagogie Waldorf, entretiendront les participants de la méthode Waldorf.

Également au programme: l'enseignement assisté par ordinateur, l'immersion en langue française, les enfants doués et handicapés sur le plan de l'apprentissage, l'enseignement aux adultes et le vieillissement.

Toutes les activités ont lieu au 7^e étage du pavillon Hall, 1455, boul. de Maisonneuve ouest, au salon des professeurs. Pour de plus amples renseignements ou pour obtenir le programme intégral, s'adresser au Département des sciences de l'éducation, 879-4535.

POUR DIFFUSION IMMÉDIATE
